Vì Trẻ Em Việt Nam

2010 PROGRAM ACCOMPLISHMENTS

The statistics below represent the children whose lives were transformed because of the generosity of our donors. The services listed are the primary support provided. Many of these children also received additional secondary care (not reflected below). Our approach is to assist children holistically in the context of their family and social network thus many children are helped in secondary ways. Indeed, ultimately our goal is to help children and families become self-supporting. To accomplish this goal takes a great concerted effort and many resources. On behalf of all of these children, we extend our appreciation for the generous support received this year and years past. – Nancy Letteri, Executive Director
